Applicant's response filed 11/18/02 have been received and reviewed. Claims 1-4 are still pending in this application.

Claim Rejections - 35 USC § 101 and - 35 USC § 112

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4 are again rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific asserted utility or a well established utility.

Claims 1-4 are also again rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific asserted utility or a well established utility, one skilled in the art clearly would not know how to use the claimed invention.

A utility for the compound produced by the instant process is not taught in the specification nor was it readily apparent. Applicants argue that the compound produced has two uses, namely, "they promote the use of silicon in rice plants in the formation of leaves, stems and husks" and that they "are of use in treatment of silicosis by assisting in solubilization of silicon deposits in the lungs of those suffering from this disease." These disclosed utilities lack support of any kind. Because the compounds produced by the present claims are not supported by a specific asserted utility for the reasons set forth above, credibility cannot be assessed.
